- In just three years, an estimated 50 billion new devices will be connected. Businesses have a \$19 trillion opportunity—if they can seize this digital revolution securely. All it takes: a holistic approach to cyber security. Enacting layers of protection from routing and switching to the cloud and beyond. Only Cisco offers a portfolio that integrates security at every step.

# Overcome security challenges

## Stop threats at the edge:

Digital businesses can't afford to have downtime. An NGFW protects your network from advanced threats.

Guard the perimeter

## Protect Users where they are:

Only 75% of workers stay on a corporate network. Protect them everywhere by extending NGFW and harnessing secure DNS.

Defend the cloud

## Find and contain Problems Fast:

You're compromised. Now what? Find, stop, and remove malware with a simple and easy-to-use solution.

Detect threats fast

# Cisco leads the security industry...

## In breach detection

According to a recent NSS labs study, Cisco solutions discovered 100% of malware, exploits, and evasions.
